A software engineer with 6+ years of experience. Recruiter, if you're reading this, let me tell you that I'm the best option for the vacancy for one simple reason: I make the guacamole for the New Year's party. Among other things that are really irrelevant to practically everyone, I use Arch Linux and Nvim for work, because that's what a programmer with a lumberjack beard and advanced baldness like me does.

Work Experience

Binance Software Developer A breif description about the job <ul style="list-style-type: none">BackendSoftware architectureMainframe	2023-2025
